

# Multiplying and dividing

260

40

2,600

4

Write the product in the box.

$33 \times 10 = \square$

$21 \times 10 = \square$

$42 \times 10 = \square$

$94 \times 100 = \square$

$36 \times 100 = \square$

$81 \times 100 = \square$

$416 \times 10 = \square$

$204 \times 10 = \square$

$513 \times 10 = \square$

$767 \times 100 = \square$

$821 \times 100 = \square$

$245 \times 100 = \square$

Write the quotient in the box.

$120 \div 10 = \square$

$260 \div 10 = \square$

$470 \div 10 = \square$

$300 \div 100 = \square$

$800 \div 100 = \square$

$400 \div 100 = \square$

$20 \div 10 = \square$

$30 \div 10 = \square$

$70 \div 10 = \square$

$500 \div 100 = \square$

$100 \div 100 = \square$

$900 \div 100 = \square$

Write the number that has been multiplied by 100.

$\square \times 100 = 5,900$

$\square \times 100 = 71,400$

$\square \times 100 = 72,100$

$\square \times 100 = 23,400$

$\square \times 100 = 1,100$

$\square \times 100 =$

$\square \times 100 = 8,400$

Write the number that has been divided by 100.

$\square \div 100 = 2$

$\square \div 100 = 8$

$\square \div 100 = 21$

$\square \div 100 = 18$

$\square \div 100 = 86$

$\square \div 100 = 21$

$\square \div 100 = 10$

$\square \div 100 = 59$
